Gerti Dücker Lecture Series

Wintersemester 2026/2027

Tuesday, December 1st, 2026
at 12:30 pm Lecturehall 201
Schlossplatz 4

Tatjana Kleine
LMU Munich

"When chloroplasts are in trouble: coordinating organelle development and nuclear responses"

To support women in science, there will be a meeting with the speaker before the talk at 11:15 in the library, 1st floor Schlossplatz 7, where female students and staff can connect with the speaker. Please sign up for this meeting by writing to jutta.loebel@uni-muenster.de.

Gertrud Dücker, born on February 9, 1928, began her studies in zoology, botany, and chemistry at the **University of Münster in 1950**. She completed her doctorate in 1956. In **1970**, Professor Dücker was appointed **professor and director** of the newly founded **Institute for Behavioral Research** at the University of Münster. Her **pioneering work** on the **cognitive abilities** and **sensory capabilities** of **vertebrates** was far ahead of its time. She taught her subject with enthusiasm and dedication. Supporting young scientists was very close to her heart.
