

Public lecture series of the Münster Graduate School of Evolution

› The Growth of the Evolutionary Thought

Winter semester 2019/20 | Mondays 17.00 – 18.15

- 
- October 28** **Jürgen Brosius**
Institute of Experimental Pathology, WWU
The RNA world never ended
- November 4** **Wojciech Makatowski**
Institute of Bioinformatics, WWU
The dangers of Intelligent Design ideology
- November 11** **Franz Goller**
Institute of Animal Physiology, WWU
Vocal athleticism - the evolution of vocal diversity in birds
- November 18** **Hans Kerp**
Institute of Geology and Palaeontology
The evolution of land plants: The first 150 million years
- November 25** **Annette Becker**
Institute of Botany, Justus-Liebig- University Giessen
Origin and evolution of flowering plants
- December 2** **Jan Baedke**
Institute of Philosophy I, Ruhr-University Bochum
The concept of environment in evolutionary thought - from early 20th century until today
- December 9** **Mark Lammers**
Institute for Evolution and Biodiversity, WWU
Adaptive evolution through the loss of essential metabolic traits: A paradox?
- December 16** **Meike Wittmann**
Theoretical Biology, Bielefeld University
Eco-evolutionary feedbacks and the maintenance of diversity in ecology and evolution
- January 13** **Chiara Elettra Ferrario**
Centre for Philosophy of Science, WWU
Cultural evolution: Past and future perspectives
- January 20** **Kathrin Lampert**
Institute of Zoology, University of Cologne
Does it have to be sex? Genetic variability in a clonal fish
- January 27** **Bryan C. Daniels**
Arizona State University and Sante Fe Institute for Biosocial Complex Systems, USA
The Logic of Collective Computations in Biology
- Social room, Hüfferstr. 1*

Lectures are held in the **seminar room (001)** of the **northern Kavaliershäuschen** (Schlossplatz 6) with **free drinks afterwards**.
