Requirements of practical work experience within the M.Sc. Psychology at the University of Münster, Germany

The Master of Science (M.Sc.) in Psychology at the University of Münster requires the students to experience 12 weeks of practical psychological work. The internship has to be supervised by a Psychologist, who earned a Master degree in Psychology from a higher educational institution. The 12 weeks can be divided in shorter periods of time, but need to comprise at least 4 weeks of work. It is possible for the students to fulfill the practical training by working full-time or part-time. 160 hours of work equal the minimum of 4 weeks of practical training. Students, who have started their masterdegree in 2017/18 only need a minimum of 140 hours. In order to receive credits for the internship, the students need to hand in a written confirmation signed by the supervisor, which describes the practical work and states the total amount of completed working hours.
