

Der **SAFIR-Newsletter zur Forschungsförderung** informiert Sie regelmäßig über Forschungsförderungsprogramme, -preise, nützliche Suchmaschinen zu Förderungen sowie Informationsveranstaltungen:

## **1. For all departments**

### **AXA Research Fund: „Call for projects, post-doctoral fellowships and doctoral fellowships“**

Areas of research eligible for funding by the AXA Research Fund:

- Environmental risks (natural catastrophes, climate change and associated risks)
- Life risks (aging and long-term care, emerging biomedical risks (emerging infectious diseases and pandemics), addictions and risky behaviors)
- Socioeconomic risks (Geopolitical risks at regional or international level, macroeconomic risks, large corporate risks, sociology and psychology of risks)

Only registered research institutions may submit applications through their operational contact. No individual applications will be considered. During the first round, the institutions announce their intent to propose candidates for a given campaign and specify the anticipated research field(s) they wish to apply for, explaining the strengths and characteristics of both the institution and the proposal. Once selected for application by the Fund, institutions may propose candidates, who will then submit their applications online during the second round. Projects are funded for 3 - 5 years, post-doctoral fellowships for two years, doctoral fellowships for three years.

**Deadline doctoral and post-doctoral fellowships: 02. - 19. January 2012**

**Deadline projects: 08. February 2012 - 16. March 2012**

29. May 2012 - 21. June 2012 for post-doctoral fellowships (2nd wave).

Operational contact at the WWU for proposals during the first round of application:

Dr. Katharina Steinberg, Dez. 6

Tel. 0251/83-22151
