Frank Natterer

Schriftenverzeichnis

1. Einschließungen für die großen Eigenwerte bei gewöhnlichen Differentialgleichungen zweiter und vierter Ordnung. *Numer . Math.* **13**, 78-93 (1969).

2. Numerische Behandlung singulärer Sturm-Liouville-Probleme. *Numer. Math.* **13**, 434-447 (1969).

3. Numerical methods of high-order accuracy for singular nonlinear boundary value problems. (Zusammen mit P.G. Ciarlet und R.S. Varga). *Numer. Math.* **15**, 87-99 (1970).

4. Schranken für die Eigenwerte gewöhnlicher Differentialgleichungen durch Spline- Approximation. *Numer. Math.* **14**, 346-354 (1970).

5. Berechnung der Norm der Inversen eines Differentialoperators zweiter Ordnung. *Computing* **5**, 214-220 (1970).

6. Schranken für die Norm der Greenschen Funktion gewöhnlicher Differentialoperatoren. *Numer. Math.* **17**, 402-408 (1971).

7. A generalized spline method for singular boundary value problems of ordinary differential equations. *Lin. Alg. Appl.* **7**, 189-216 (1973).

8. Eine Erweiterung des Maximumprinzips für den Laplaceschen Operator. (Zusammen mit B. Werner). *Numer. Math.* **22**, 149-156 (1974).

9. Das Randwertproblem für eine Klasse singulärer gewöhnlicher Differentialausdrücke. *Aequationes Mathematicae* **12**, 207-228 (1975).

10. Das Differenzenverfahren für singuläre Rand-Eigenwertaufgaben gewöhnlicher Differentialgleichungen. *Numer. Math.* **23**, 387-409 (1975).

11. Berechenbare Fehlerschranken für die Methode der Finiten Elemente. *ISNM* **28**, 109-128 (1975).

12. Über die punktweise Konvergenz Finiter Elemente. *Numer. Math.* **25**, 67-77 (1975).

13. Optimale L_2-Konvergenz Finiter Elemente bei Variationsungleichungen. *Bonner Mathematische Schriften* **89**, 1-11 (1976).

14. Uniform convergence of Galerkin's method for splines on highly nonuniform meshes. *Math. Comp.* **31**, 457-468 (1977).

15. The finite element method for ill-posed problems. *RAIRO Analyse numerique* **11**, 271-278 (1977).

16. Regularisierung schlecht gestellter Probleme durch Projektionsverfahren. *Numer. Math.* **28**, 329-341 (1977).

17. Berechnung oberer Schranken für die Norm der Ritz-Projektion auf Finite Elemente. *ISNM* **39**, 236-245 (1978).

18. Acceleration of convergence for finite element solutions of the Poisson equation on irregular meshes. (Zusammen mit A. Louis). *TR Fachbereich 10 der Universität des Saarlandes.*

19. Numerical inversion of the Radon transform. *Numer. Math.* **30**, 81-91 (1978).

20. Numerical analysis of ill-posed problems. Fundacao Universidade de Brasilia, *Trabalho de Matemática* **No. 145** (1979).

21. A Sobolev space analysis of picture reconstruction. *SIAM J. Appl. Math.* **39**, 402-411 (1980).

22. Efficient implementation of "optimal" algorithms in computerized tomography. *Math. Meth. Appl. Sci.* **2**, 545-555 (1980).

23. On the smoothing property of the Bayes approach to picture reconstruction. *TR Fachbereich 10 der Universität des Saarlandes* (1978).

24. An ultra-fast algorithm in tomography. (Zusammen mit K.H. Löw). *TR Fachbereich 10 der Universität des Saarlandes* (1981).

25. On the inversion of the attenuated Radon transform. *Numer. Math.* **32**, 431-438 (1979).

26. Vorausberechnung des Grubenklimas in sonderbewetterten Betrieben. (Zusammen mit Quack, H. und Güsmann, B.). *Abschlußbericht über das Projekt Nr. 01 VB 285 - Z 13 TAP 0005 des BMFT*, Januar 1979.

27. Genauigkeitsfragen bei der numerischen Rekonstruktion von Bildern, *in Ansorge, R. (ed.): Vorträge auf der Tagung über Numerische Mathematik aus Anlaß der Emeritierung von L. Collatz*, ISNM Birkhäuser Verlag, Januar 1979.

28. The ill-posedness of Radon's integral equation. *Proc. of the Symposion on ill-posed problems: Theory and Practice*, Delaware, USA, October 2-6 (1979).

29. The identification problem in emission computed tomography. *In: Herman, G.T. - Natterer, F. (eds.): Mathematical Aspects of Computerized Tomography.* Springer 1981.

30. On the order of regularization methods. *ISNM* **63**, 189-203 (1983).

31. Computerized tomography with unknown sources. *SIAM J. Appl. Math.* **43**, 1201-1212 (1983).

32. Error bounds for Tikhonov regularization in Hilbert scales. *Appl. Anal.* **18**, 29-37 (1984).

33. Exploiting the ranges of Radon transforms in computerized tomography. *In: Deuflhard, P. - Hairer, E. (eds.): Numerical Treatment of Inverse Problems in Differential and Integral Equations.* Birkhäuser 1983.

34. Some non-standard Radon problems. *In: Boffi, V. - Neunzert, H. (eds.): Applications of Mathematics in Technology.* Teubner 1984.

35. Mathematical problems of computerized tomography. (Invited paper, zusammen mit A. Louis). *Proceedings of the IEEE* **71**, 379-389 (1983).

36. Einige Beiträge der Mathematik zur Computer-Tomographie. *ZAMM* **64**, T252-T260 (1984).

37. Discretization ill-posed problems. Publicazioni dell'istituto di analisi globale e applicazioni, serie *Problemi non ben posti ed inversi*, **n. 9**, Firenze 1983.

38. Some ill-posed problems arising in connection with Radon's integral equation. Publicazioni dell'istituto di analisi globale e applicazioni, serie *Problemi non ben posti ed inversi*, **n. 8**, Firenze 1983.

39. Efficient evaluation of oversampled functions. *J. Computational and Applied Mathematics* **14**, 303-309 (1986).

40. Computable error bounds for linear systems via backward analysis. *Preprint, Institut für Numerische und instrumentelle Mathematik, Münster 1985.*

41. Fourier reconstruction in tomography. *Numer. Math.*, **47**, 343-353 (1985).

42. Numerik des Radonschen Problems. *Jber. d. Dt. Math. Verein.* **87**, 108-126 (1985).

43. Numerical treatment of ill-posed problems. *In: Talenti, G. (ed.): Inverse problems*, p. 142-167. Springer 1986.

44. The Mathematics of Computerized Tomography. Wiley - Teubner 1986, 222 S.

45. Severely ill-posed Radon problems. *In: Engl, H.W. - Groetsch, C.W. (eds.): Inverse and ill-posed problems*, p. 247-259. Academic Press 1987.

46. Attenuation correction in emission tomography. *In: Sabatier, P. (ed.): Inverse Problems*, p. 21-33. Academic Press 1987.

47. Mathematics and tomography. *In: McKenna, J. - Temam, R. (eds.): Proceedings of the first international conference on industrial and applied mathematics, SIAM*, Philadelphia 1988, p. 183-199.

48. Regularization techniques in medical imaging. *In: Viergever, M.A. - Todd-Pokropek, A. (eds.): Mathematics and Computer Science in Medical Imaging*, p. 127-142. NATO ASI series 1987.

49. The attenuated Radon transform. *In: Viergever, M.A. - Todd-Pokropek, A. (eds.): Mathematics and Computer Science in Medical Imaging*, p. 271-278. NATO ASI series 1987.

50. Resolution in computerized tomography. *In: Meyer-Ebrecht, D. (Hrsg.): ASST'87*, p. 29-36. Springer 1987.

51. Identifying a coefficient in a stationary Boltzman equation. Publicationi dell'istituto di analisi globale e applicazioni, *Problemi non ben posti ed inversi*, **n. 38**. Firenze 1988.

52. Attenuation correction in PET. (Zusammen mit H. Herzog, KfA Jülich), *Mathematical Methods in the Applied Sciences* **15**, p. 321-330 (1992).

53. An inverse problem for the transport equation and integral geometry. *Proceedings of the AMS conference on Integral Geometry*, Arcata 1989, *Contemporay Mathematics, AMS* 1990.

54. Tomography with unknown directions. To appear in the *Proceedings of the Oberwolfach Conference on "Mathematical Methods in Tomography", 1990.* Springer 1991.

55. A discrete Gelfand-Levitan theory, Preprint.

56. A Lanczos type method for inverse Sturm-Liouville problems. *Proceedings of the Centre for Mathematics and its Applications*, Australien *National University*, **31**, 82-88, (1992).

57. Discrete inverse evolution problems. *In: Sabatier, P. (ed.): Inverse Problems in Action*, p. 29-37. Springer 1990.

58. 2D sampling in tomography. In: Laurent, P.J. - Le Méhauté, A. - Schumaker, L.L. (eds.): *Curves and Surfaces*, Academic Press 1991.

59. Basic algorithms in tomography. (Zusammen mit A. Faridani), *in: Grünbaum, F.A. - Helton, J.W. - Khargonekar, P. (eds.): Signal Processing PART II: Control Theory and Applications*, p. 321-334, Springer 1990.

60. A tutorial in tomography. *Procedings of the conference on "Problèmes Inverses"*, Rocquencourt 1990. *INRIA, Domaine de Voluceau BP 105, F-78153 Le Chesnay Cedex.*

61. Local and global tomography. (Zusammen mit A. Faridani, F. Keinert, E.L. Ritman, K.T. Smith), *in: Grünbaum, F.A. Helton, J.W. - Khargonekar, P. (eds.): Signal Processing PART II: Control Theory and Applications*, p. 241-256, Springer 1990.

62. Mathematische Methoden der Computer–Tomographie. *Rheinisch- Westfälische Akademie der Wissenschaften*, Vorträge **N375**, S. 7-25. Westdeutscher Verlag 1990.

63. *The Mathematics of Computerized Tomography (Russisch).* Erweiterte Ausgabe von 44. *MIR*, Moskau 1990.

64. A finite difference method for the inverse scattering problem at fixed frequency (with F. Wübbeling). Proceedings of the Lapland conference on Inverse Problems, June 1992.

65. Sampling in fan beam tomography, *SIAM J. Appl. Math.*, **53**, 358-380 (1993).

66. Determination of tissue attenuation in emission tomography of optically dense media, *Inverse Problems* **9**, p. 731-736 (1993).

67. Efficient scanning in fan beam tomography. *SPIE* **1767**, 320-325 (1992).

68. Tomography with few data, in: Anger et al. (eds.): Inverse Problems: Principle and Applications in Geophysics, Technology, and Medicine. Akademie-Verlag 1993.

69. Sampling and resolution in CT, in: M.M. Lavrent'ev (ed.): Computerized Tomography, p. 343-354. VSP Utrecht, 1995.

70. Recent developments in x-ray tomography, *in: Quinto, E.T. - Cheney, M. - Kuchment, P. (eds.): Tomography, Impedance Imaging, and Integral Geometry. Lecture Notes in Applied Mathematics*, Vol. **30**, AMS 1994.

71. Reconstruction of Process Tomography Images (Keynote Review), *in: Beck, M.S. et al. (eds.): Proceedings of ECAPT'94, March 24-26, Porto 1994.*

72. Finite Difference Methods for Inverse Problems, *Proceedings of the Workshop on Inverse Problems, HoChiMinh City, January 17-19 (1995).*

73. A Propagation-Backpropagation Method for Ultrasound Tomography, *Inverse Problems* **11**, 1225-1232 (1995).

74. Numerical Solution of Bilinear Inverse Problems, Technical Report **19/96-N**, Fachbereich Mathematik der Universität Münster.

75. Accurate Attenuation Correction in Spect Without Transmission Measurements, (with A. Welch, R. Clack, G.T. Gullberg). *IEEE NSS-MIC Conference, San Franzisco, Oct. 21-28 (1995).*

76. An initial value approach for inverse Helmholtz problems, Proceedings of the Conference "Inverse Problems in Medical Imaging and Nondestructive Testing", Oberwolfach, February 4-10, 1996, 1996. To appear Springer 1996.

77. Algorithms in Tomography. Proceedings of the Conference 'State of the Art in Numerical Analysis", York, April 1-4, 1996. To appear Oxford University Press 1996.

78. An Algorithm for 3D Ultrasound Tomography, Talk to be presented at the Conference "Inverse problems of wave propagation and diffraction", Aix-les-Bains, September 23-27, 1996.

79. Resolution and Reconstruction for a Helical CT-Scanner, Technical Report **20/96-N**, Fachbereich Mathematik der Universität Münster.
