Automatic Labeling of Handwritten Mathematical Symbols via Expression Matching

Nina S. T. Hirata and Willian Y. Honda

University of São Paulo

Institute of Mathematics and Statistics

Department of Computer Science

Work supported by CNPq, Brazil

- **Handwritten recognition is attracting even more attention**
(we focus on handwritten mathematical expression recognition)
- **It poses difficulties related to classification with large number of classes and large variation in writing style**
- **Evaluation and comparison of recognition algorithms suffers from the nonexistence of benchmark datasets**
- **We do need an easy and simple way of generating ground-truthed data**

Overview of the proposed approach
