

The International Masters Program (Master of Science, M.Sc.) in Geospatial Technologies is a cooperation of

- University of Münster (WWU), Institute for Geoinformatics (ifgi), Münster, Germany
- Universitat Jaume I (UJI), Institute of New Imaging Technologies (INIT), Castellón, Spain, and,
- Universidade Nova de Lisboa (UNL), NOVA – Information Management School (NOVA-IMS), Lisboa, Portugal.

The Masters Program has been selected within the Erasmus+/Erasmus Mundus Program of the European Commission. The following grants are open for applications (exact numbers to be confirmed):

- **2 scholarships** to EU students (in this context nationals or residents (> 1 year) from EU Member States and EEA-EFTA countries).

The scholarship includes a support towards living costs of 1.000 € per month (18.000 €), coverage of tuition fees of 1.500 € per semester (4.500 € in total), and an insurance package (numbers to be confirmed).

- **18 scholarships** to third country students (other nationals or residents than above), whereas some of these scholarships are dedicated to specific countries.

Scholarships include a contribution to travel, installation and all other types of costs (5.000 € or 7.000 € in total), monthly allowances of 1.000 € per month (18.000 € in total), coverage of tuition fees of 3.500 € per semester (10.500 € in total), and an insurance package (numbers to be confirmed).

- **2 scholarships** for scholars (visiting researchers) for teaching tasks. Scholarships include a lump sum of 5.000 € (to be confirmed) for supporting all types of costs, duration and dates to be announced separately.

Call for Scholarship Applications

Master of Science in Geospatial Technologies

International Erasmus Mundus

Targeted students:

The Masters program targets holders of a Bachelors degree with a qualification in application areas of Geographic Information (GI) and at least basic background in Computer Science and/or Geoinformatics.

Applicants with professional experience in a GI application area are very welcome. Degree holders already acquired similar qualification as offered in the Masters Program in Geospatial Technologies are discouraged from application.

Targeted scholars:

Scholars are expected to conduct research in the context of ongoing research projects and teach within the study program of the hosting universities. Please check the homepage or contact the program coordinator at each university regarding their research and teaching priorities. Academic achievements and research and teaching experience in the field of GI Science are essential.

Deadlines

- Application for scholarships: January 15, 2017
- Application as self-financed student: July 31, 2017 (earlier application recommended i.e., for non-EU students)
- Start of the Masters program: September 1, 2017
