

WESTFÄLISCHE WILHELMS-UNIVERSITÄT MÜNSTER

The International Research Training Group Münster/Germany – Amsterdam-Leiden/Holland

***Generation of Supramolecular Functional Cavities – Container Molecules,
Macrocycles and Related Compounds***

funded by the Deutsche Forschungsgemeinschaft and the Netherlands Organisation for Scientific Research is seeking highly qualified and motivated candidates for

Doctoral Student Positions

starting at 01.03.2007

The Graduate School is based at the University Münster. A significant part (min. 6 months) of the studies will be carried out at one of the partner universities in Holland.

The interdisciplinary program provides exciting research opportunities in the field of supramolecular chemistry, of macrocyclic and cage-like molecules and their applications in catalysis and materials chemistry.

The program is aimed at outstanding candidates with an excellent diploma or master degree in chemistry and fluency in spoken and written English. Applicants should submit a full CV, a description of their research interests, copies of degree certificates and academic transcripts to the Office of the International Research Training Group, Corrensstr. 30/36, 48149 Münster.
