

## Interdisciplinary Scholarships

In the collaborative research association **InChangE**, the University of Münster and Bielefeld University explore the causes, mechanisms and consequences of individualisation in changing environments in an interdisciplinary discourse between natural sciences, social sciences and humanities.

For this purpose, we provide exchange scholarships for conducting an interdisciplinary research project at the participating institutions in Bielefeld or Münster.

The disciplines represented in InChangE are biology, philosophy, sociology, economics, psychology, geoinformatics, medicine and health sciences. A list of participating researchers can be found below.

### Who can apply?

Applications are open to PhD students and advanced Master students from the Universities of Bielefeld and Münster as well as from other universities all over the world. Additionally, the scholarships are available for applicants who completed their Master or PhD recently.

### What is funded?

The requirement is that the research stay is carried out in another discipline than the own. Questions related to the research fields of InChangE should be examined from different disciplinary approaches – the subprojects of InChangE address causes and mechanisms of individualisation, modelling and prediction of individualisation, effects and consequences of individualisation in the field of tension with the common good and the cross-disciplinary synthesis of perspectives on environment and individualisation.

### Duration and scholarship payment

The scholarships are awarded for up to 3 months. The monthly stipend is 1,250 EUR. The scholarship holders are responsible for the content and the organisation of the planned project. The project coordinators and the participating researchers are available if necessary to arrange contacts or to support the scholarship holders.

## Deadline

The next application round will presumably start in 2024.

## Application

By e-mail with curriculum vitae, letter of motivation and brief description of the planned project for the exchange (max. 2 pages).

North Rhine-Westphalia

**Participating Researchers**

Prof. Dr. Anja Abendroth  
Prof. Dr. Bernhard Baune  
Prof. Dr. Nicola Bilstein  
Prof. Dr. Yves Breitmoser  
Prof. Dr. Barbara Caspers  
Prof. Dr. Jürgen Gadau  
Prof. Dr. Toni Goßmann  
Prof. Dr. Marie Kaiser  
Prof. Dr. Sylvia Kaiser  
Prof. Dr. Ulrich Krohs  
Prof. Dr. Oliver Krüger  
Prof. Dr. Joachim Kurtz  
Prof. Dr. Roland Langrock  
Prof. Dr. Diana Lengersdorf  
Prof. Dr. Annette Malsch  
Prof. Dr. Caroline Müller  
Prof. Dr. Michael Quante  
Prof. Dr. John Rauthmann  
Prof. Dr. Klaus Reinhold  
Prof. Dr. Helene Richter  
Prof. Dr. Angela Schwering  
Prof. Dr. Monika Stoll  
Prof. Dr. Christian Stummer  
Prof. Dr. Meike Wittmann

**Subject**

Technical and Social Change  
Mental Health  
Management of Smart Products  
Behavioural Economics  
Behavioural Ecology  
Molecular Evolution and Sociobiology  
Evolutionary Genetics  
Philosophy of Science  
Behavioural Biology and Endocrinology  
Philosophy of Science  
Animal Behaviour  
Animal Evolutionary Ecology  
Statistics and Data Analysis  
Sociology of Gender  
Environment and Health  
Chemical Ecology  
Ethics and Practical Philosophy  
Differential Psychology  
Evolutionary Biology  
Behavioural Biology and Animal Welfare  
Geoinformatics  
Genetic Epidemiology  
Innovation and Technology Management  
Theoretical Biology
