

Model Theory Meets Geometric Group Theory

Young
Mathematicians
Conference
Network

3–7 February 2025 | University of Münster, Germany

Model Theory meets GGT is a week-long conference aimed at bringing together young researchers in the areas of Model Theory and Geometric Group Theory. These two areas exhibit a rich interplay, and the mini-courses and research talks will be aimed to display topics in this intersection. Furthermore, there will be a lightning talks session in which all participants are encouraged to give a brief introduction to their own research and interests, so as to foster even more interaction between the participants.

Mini-courses Speakers

Simon André
Montse Casals
Thomas Koberda

Organisers

Marco Amelio
Benjamin Brück
Zahra Mohammadi

Research Talks Speakers

Laura Ciobanu
Jonathan Fruchter
Radhika Gupta
Alice Kerr
Jone Lopez De Gamiz Zearra
Chloé Perin
