

Announcement

The 17th International Congress Thermophiles 2025 will be held in Münster (Germany), September 07 – 11, 2025.

Conference Scope

The Thermophiles Congress series focuses on various aspects of the biology of thermophilic microorganisms. Specific topics of interest include:

- Geochemical processes and elements' cycling
- Thermophiles, evolution of life and astrobiology
- Newly cultured and uncultured taxa of thermophiles
- Genome evolution and integrity, DNA replication
- Regulation of gene expression Viruses of thermophiles, microbe-virus interactions and defense mechanisms
- Metabolism and physiology of thermophiles
- Enzyme discovery and applications
- Genetic systems and engineering thermophiles for industrial applications
- Cell biology, cellular structures and envelopes, motility
- Systems approaches and OMICS
- Microbial associations and host-symbiont interactions in high-temperature environments
