University of Münster

For a strong and multifaceted cooperation
between the University of Münster and Brazil

› The University of Münster

The University of Münster is one of Germany's largest universities with more than 45,000 students. Its 15 faculties, including the University of Music, offer more than 280 degree programmes in nearly every field of knowledge. The University attaches particular importance to the close connection between teaching and research, as well as extensive advice and counselling services and high student graduation rates.

In numerous fields, such as medicine, chemistry, physics, battery research, evolutionary research, as well as in interdisciplinary fields in the humanities and social sciences, the University of Münster conducts internationally renowned high-level research. The clusters of excellence "Mathematics Münster" and "Religion and Politics", which bring together outstanding researchers from all over the world, deserve special mention. Even beyond these areas, the University of Münster specifically promotes young researchers and interdisciplinary cooperation. Numerous academic awards and extensive funding are proof of the University's recognised commitment to research.

Besides the University's strong reputation in research and teaching, the high quality of life in Münster is a key factor in attracting students and researchers from Germany and abroad to study, conduct research or teach at the University of Münster.

› Brazil Centre

For more than 60 years, the University of Münster has maintained numerous collaborations with researchers and universities in Brazil. With the foundation of the Brazil Centre in 2010, the University management signalled its commitment to strategically cooperating with this important South American country. The mission of the Brazil Centre is to support and further develop the multifaceted cooperation between the University of Münster and Brazil in all faculties, as well as to stimulate new initiatives. In addition, the Brazil Centre has recently initiated collaborations in other Latin American countries.

Whether in the field of research, teaching, studying or knowledge transfer, the Brazil Centre offers its members and the entire University advice and support regarding exchange and cooperation activities with Brazil. The liaison office of the Brazil Centre at the German Centre for Research and Innovation São Paulo DWIH-SP provides students and researchers with a local contact point and promotes networking with the Brazilian scientific community.

15th anniversary 2010–2025

Our services:

- › We offer **advice and support** for professors, researchers and students at the University of Münster and in Brazil.
- › We maintain **partnerships** with Brazilian universities, Brazilian funding organisations and German institutions and are continuously expanding **networks** such as our Brazilian alumni group of the University of Münster.
- › Through **marketing and communication** activities, we increase the visibility of the University of Münster in Brazil and promote exchange and cooperation opportunities with Brazil at our university.
- › We generate **knowledge and incentives** for strengthening and expanding the cooperation between the University of Münster and Brazil.

Feel free to contact us!
