

Module III.2 External Module (10 LP)

In the External Module, students attend courses outside the English Department in order to gain interdisciplinary knowledge. Students will **participate in courses from related disciplines**, such as history, philosophy, theology, sociology, and psychology. Students can also count one course in a foreign language at the university's Sprachenzentrum towards this module if they prefer.

At least one course must have a **graded assignment** (term paper, exam, etc.).

The ideal organizational timeline is as follows:

- End of Semester 2
 - Check the BAPS folder on Learnweb for recommended classes offered by other departments. Be aware that registration procedures and deadlines might
 - Fill out two (identical) [Course Agreement Forms](#) and seek approval from the BAPS representative
- Semester 3
 - Sign up for the External Module during the SLCM registration period
 - Submit written confirmation of course participation, credit points and grade(s) as well as your copy of the Course Agreement Form to the BAPS representative

Students should consult the [External Module Guide](#).

If you intend to spend a **semester abroad**, classes studied there may also be recognized within your External Module. Please check the English Department website for our partnerships with other universities and get in touch with the BAPS representative about your Learning Agreement before embarking on your stay abroad.

You may also have courses recognized for your External Module that you studied within another M.A. or M.Ed. program, but at least one of the courses studied needs to be graded.

Note: In this module individual courses are **not registered for on SLCM**. Instead, students received verbal consent from instructors to attend their courses and proof of course completion/grades in the form of written certificates. Individual instructors should provide such letters upon request at the end of the course. All certificates and letters as well as the filled-out and approved agreement form are handed in for course credit.

The QISPOS exam numbers for this module are:

- 20010 Overall results
