

Public lecture series of the Münster Graduate School of Evolution

› The Growth of the Evolutionary Thought

Winter semester 2017/18 | Mondays 17.00 – 18.15

- | | | | |
|--------------------------------------|---|--------------------------------------|--|
| <p>October
30</p> | <p>Hans Kerp
Institute of Geology and Palaeontology, WWU
<i>The evolution of the geological timescale – The concept of time in geosciences</i></p> | <p>December
11</p> | <p>Joachim Kurtz
Institute for Evolution and Biodiversity, WWU
<i>Rapid adaptations of hosts and parasites</i></p> |
| <p>November
6</p> | <p>Jürgen Schmitz
Institute of Experimental Pathology, WWU
<i>Transposed elements in generation of functional plasticity</i></p> | <p>December
18</p> | <p>Juanma Vaquerizas
MPI for Molecular Biomedicine
<i>Chromatin conformation in evolution, development and disease</i></p> |
| <p>November
13</p> | <p>William F. Martin
Institute of Molecular Evolution, University of Düsseldorf
<i>Hydrothermal vents, the origin of life and the biology of the first cells</i></p> <p style="color: red; font-style: italic;">Lecture hall HHü, Hüfferstr. 1</p> | <p>January
8</p> | <p>Nina Kranke
Department of Philosophy, WWU
<i>Species problems - Why bother?</i></p> |
| <p>November
20</p> | <p>Susann Wicke
Institute for Evolution and Biodiversity, WWU
<i>Genomic consequences to heterotrophy in plants</i></p> | <p>January
15</p> | <p>Ivan Bedzhov
MPI for Molecular Biomedicine
<i>Of Mice and Men – early embryogenesis and pluripotency in rodents and primates</i></p> |
| <p>November
27</p> | <p>Hans-Dieter Görtz
Biological Institute, University of Stuttgart
<i>Microbial concepts for the eukaryotic tree of life</i></p> | <p>January
22</p> | <p>Luca Melotti
Department of Behavioural Biology, WWU
<i>I just want to be me - Individuality in animals and its relevance for behaviour, physiology and evolution</i></p> |
| <p>December
4</p> | <p>Ulrich Dobrindt
Institute of Hygiene, WWU
<i>Bacterium - host interaction and bacterial adaptation: new insights from extraintestinal pathogenic E. coli</i></p> | <p>January
29</p> | <p>Thomas Junker
Faculty of Biology, University of Tübingen
<i>The hidden nature of human sexuality</i></p> <p style="color: red; font-style: italic;">Lecture hall HHü, Hüfferstr. 1</p> |

Unless otherwise noted, lectures are held in the **seminar room (001)** of the **northern Kavaliershäuschen** (Schlossplatz 6) with **free drinks afterwards**.
