

Available Projects

- Evolution-Inspired Protein Engineering and Design
 - Adaptive Laboratory Evolution: Disentangling and Combining Mutations to Reveal Epistatic Effects (2 projects)
 - Historical Protein Evolution: Emergence of Sulfatase Activity in the MBL superfamily
- Are *de novo* Genes Real?
 - Characterization of possible *de novo* genes from various eukaryotes
- Domain projects
 - Isoforms with domain composition differences
 - Creating a benchmark for RADS
- Insect Genomics
 - The role of transposable elements in the evolution of eusociality in *Blattodeae*

Dr. Bert van Loo

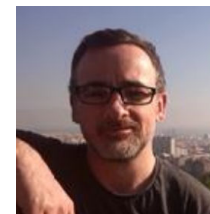

Berndjan Eenink

Dr. Andreas Lange

Dr. Carsten Kemena

Dr. Mark Harrison

Dr. Evelien Jongepier
