

THE HYBRID HISTORY OF ANCIENT ELEUSIS

Situated at the crossroads of ancient Greek history, Eleusis was subject to changing fortunes in the world. From an Athenian perspective, Eleusis marked the fringes of their territory. From everybody else's point of view, it was either a destination or a gateway: to Athens, the Saronic region and Aegean, Central Greece, or the Peloponnese.

The conference explores this inherent status of in-betweenness. It invites approaches that appreciate the local horizon as a sphere where different vectors of culture touch, both complementarily and conflictually, to shape a hybrid history of place; for instance, an amalgamation of diverse natural environments and different political entities; of boundedness and entanglement; imaginaries of isolation and belonging; material and immaterial expressions in culture that were in themselves fused by local, regional, and universal practices.

CLUSTER OF EXCELLENCE "RELIGION AND POLITICS"

The Cluster of Excellence "Religion and Politics. Dynamics of Tradition and Innovation" has been investigating since 2007 the complex relationship between religion and politics across eras and cultures. In the funding phase from 2019 to 2025, the 140 researchers from 20 disciplines in the humanities and social sciences analyze in transepochal studies ranging from antiquity to the present day the factors that make religion the motor of political and social change. The research network is the largest of its kind in Germany; and, of the Clusters of Excellence, one of the oldest and the only one to deal with the issue of religion. It will receive funding of 31 million euros from 2019 to 2025.
