

OCC Lecture WS 2014/15

Klinik für Psychiatrie und Psychotherapie, Albert-Schweitzer-Campus 1

Lecture: Konferenzraum (2. OG, 120.008) am 05.11.: Hörsaal

Neuroscience Colloquium: Hörsaal

Mittwoch: 16-18 Uhr c.t.

Termin	Referent	Thema
15.10.	Markus Lappe	Einführung OCC
22.10.	Michael Deppe	Functional relevance of microstructural brain alterations
29.10.	Karen Zentgraf	Sport expertise from a cognitive neuroscience perspective
05.11. (Hörsaal)	Axel Kohler	The individual basis of conscious perception
12.11. Masterclass: !!12.11. 11-13!!	Prof. Richard van Wezel Neuroscience Colloquium	Adaptation and memory in early visual cortical areas
19.11.	Heiko Wagner	Computational models of sensorimotor control
26.11.	Roman Liepelt	Neurocognition of Joint Action
03.12.	Carsten Wolters	Presurgical epilepsy diagnosis using EEG, MEG and MRI
10.12.	Rebekka Lencer	Smooth pursuit eye movements as endophenotype for psychotic disorders
17.12. Masterclass: 18.12. 10-12	Prof. Stefan Everling Neuroscience-Colloquium	Prefrontal cortex and cognitive control
07.01.	Jens Bölte	Morphological processing in language production and comprehension
14.01.	Matthias Bischoff	Anticipation, prediction and the senses
21.01. Masterclass: 22.02. 10-12	Prof. Florentin Wörgötter Neuroscience Colloquium	Understanding Actions and Objects: A grammatical view
28.01.	Helene Richter	Standardization in animal experiments: Necessity or fallacy
04.02. Masterclass: 05.02. 10-12	Prof. Mathias Hegele Neuroscience Colloquium	Adaptation & Animacy
