

Otto Creutzfeldt Center | Retreat 2020 | June 4th – 5th

Day I

Time	Title	Presenter
09:00	<i>Welcome Address</i>	
09:15	Lateralization of spontaneous alpha-band oscillations in human EEG biases contrast perception	Elio Balestrieri
09:40	Psychophysics reveals concurrent theta and alpha rhythmic modulation of visual perception	René Michel
10:05	The role of eye-fixations in memory encoding of natural scenes	Nico Broers
10:30	Multivariate Brain-Behaviour Associations in Major Depression	Nils Winter
10:55	<i>"Coffee Break"</i>	
11:15	Investigating the effect of sequential and semantic surprise in episodic memory retrieval	Benjamin Jainta
11:40	ALFA Pilot 2 (SEPPO2): The role of self-performance and self-perspective for self-identification and memory of self-performance	Sophie Siestrup
12:05	Emerging Insights into the Pathophysiology of Multiple Sclerosis: the Role of KCNQ Channels	Luca Fazio

Otto Creutzfeldt Center | Retreat 2020 | June 4th – 5th

Day II

Time	Title	Presenter
09:15	Serotonergic system of the anterodorsal BNST is involved in phasic and sustained fear in freely behaving mice	Margarita Hessel
09:40	Castration vs. Vasectomy - Effects on Animal Welfare	Annika Korte
10:05	Sex-specific response to acute stress in <i>Zdhhc7</i> mice	Nicole Kerkenberg
10:30	MEG study of tinnitus-associated sub-networks elicited by frequency-specific auditory stimulation	Vasiliki Salvari
10:55	<i>"Coffee Break"</i>	
11:15	Non-rigid motion perception	Krischan Koerfer
11:40	Adaptation of space during inhibition of saccadic adaptation	Frauke Heins
12:05	Combining biological motion and optic flow for heading perception	Anna Hülemeier
