

Retreat OCC Münster
July 7, 2017
Institute of Psychology, Room FI 129

Time	Title	Presenter
9:15	<i>Welcome Address</i>	
9:30	The role of alpha oscillations in visual working memory retention	Svea Schröder
10:00	Integration and segregation of task-specific areas during task preparation - A graph-theoretical analysis	Laura Quante
10:30	Motor development of individuals with neurodevelopmental disorders: Could vision play a role?	J. Walter Tolentino-Castro
11:00	<i>Coffee Break</i>	
11:30	GABAergic inhibitory interneurons in the prefrontal cortex of mice: A classification study	Roja Saffari
12:00	The role of long noncoding RNAs in individual vulnerability of C57BL6 and BALB/c mice	Ilona Schneider
12:30	<i>Lunch Break</i>	

Retreat OCC Münster
July 7, 2017
Institute of Psychology, Room FI 129

Time	Title	Presenter
14:00	Poster session	see below
15:00	<i>Coffee Break</i>	
15:30	Influences of stimulus salience on visual mismatch negativity in a roving oddball paradigm	Insa Schloßmacher
16:00	Changes in emotional processing after unilateral insular damage	Olga Schröder
16:30	<i>Closing Remarks</i>	
16:45	<i>Sports and Recreation</i>	
18:00	<i>BBQ</i>	

Poster Presentations:

Nina Heins: Movement perception during audiovisual asynchrony

Jennifer Pomp: Segmentation and categorization of single-hand actions in the context of semantic event chains

Carolin Wagener: Neuronal correlates of unconscious visual perception

Vanessa von Kortzfleisch: Don't put all your eggs in one basket - Systematic batch heterogenisation as a strategy to improve reproducibility?

Viktoria Krakenberg: Take a risk or better play safe? Implementing a touchscreen-based cognitive judgement bias test for mice

Jana Masselink: The frontal eye fields in oculomotor and visuospatial learning

Wanja Mössing: Precision-selective alpha oscillations in human visual working memory

Marlen Roehe: Measures of content and dynamics of anticipation in the brain
