

Lecture series **WS 2012/13** (Lect.-No. 132906):
Cognitive and Behavioral Neuroscience

- 25.10.2012 Prof. Dr. Weiqi Zhang**
Neurodevelopmental diseases meet at the synapse:
- from molecule over network to mental illness -
- 08.11.2012 Dr. Philippe Coulon**
Sleep and epilepsy: from spindles and sleep to spikes and seizures
- 15.11.2012 Prof. Dr. Volker Arolt**
Depression - from genes to behavior
- 22.11.2012 Dr. Sarah Weigelt**
Developmental neuroimaging:
challenges and new findings using fMRI in children
- 29.11.2012 Prof. Dr. Ricarda Schubotz**
Neurocognition of prediction
- 06.12.2012 PD Dr. Markus Junghöfer**
Affective learning in the absence of awareness
- 13.12.2012 Prof. Dr. Rebekka Lencer**
A model of smooth pursuit eye movements as endophenotype
for psychotic disorders
- 10.01.2013 Dr. Axel Kohler**
The individual basis of conscious visual experience
- 17.01.2013 Prof. Dr. Karen Zentgraf**
Are athletes' brains special?
Studies in Sports Science and Neurophysiology
- 24.01.2013 Prof. Dr. Sylvia Kaiser**
Environment, genes and behaviour
- 31.01.2013 Prof. Dr. Dr. Sven Meuth**
Ion channels in autoimmune neurodegeneration
- 07.02.2013 PD Dr. Christian Dobel**
Cognitive and neurophysiological aspects of face blindness

**The lecture will be held on Thursdays at 18:15h – 19:45h
Fliednerstr. 21, room FI 129**
