Install Windows Display Language with Microsoft Store

Windows is delivering free language updates through the Microsoft Store. Now Users can change Windows Display Language self-contained.

First open Windows Store and search for desired language.

Figure 1: Windows Store

Choose desired language and then „Get" or „Herunterladen".

Abbildung 2: Sprache auswählen

If You use the Microsoft Store for the first time, choose „No" or „Nein, danke" when message appears to sign up for Microsoft.

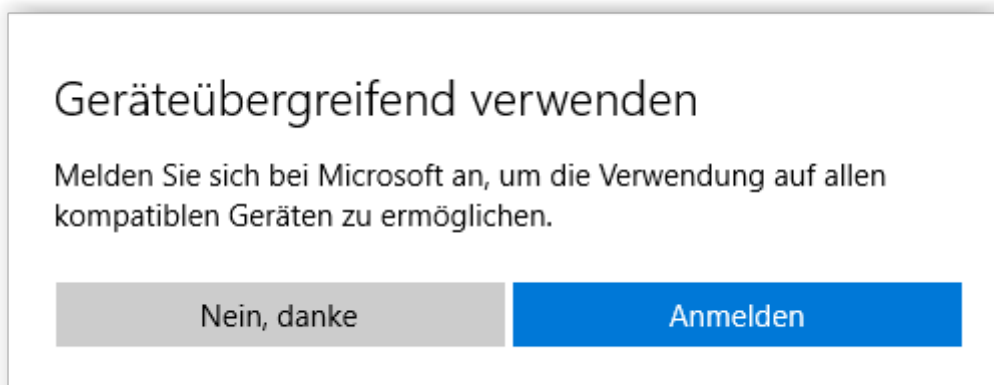

Figure 3: Microsoft Account

After installing Language Pack open it by clicking „Launch" or „Starten" to configure.

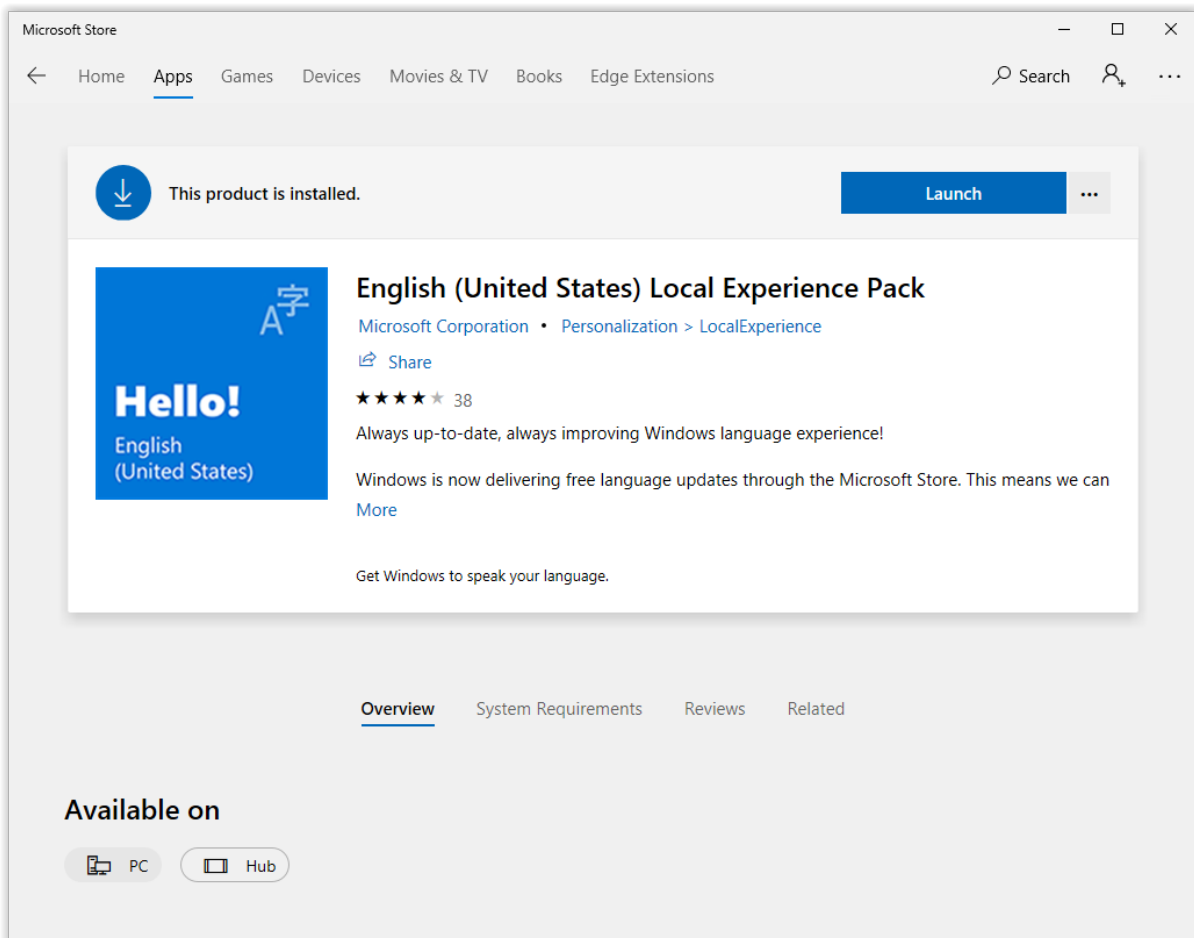

Figure 4: Launch Display Language
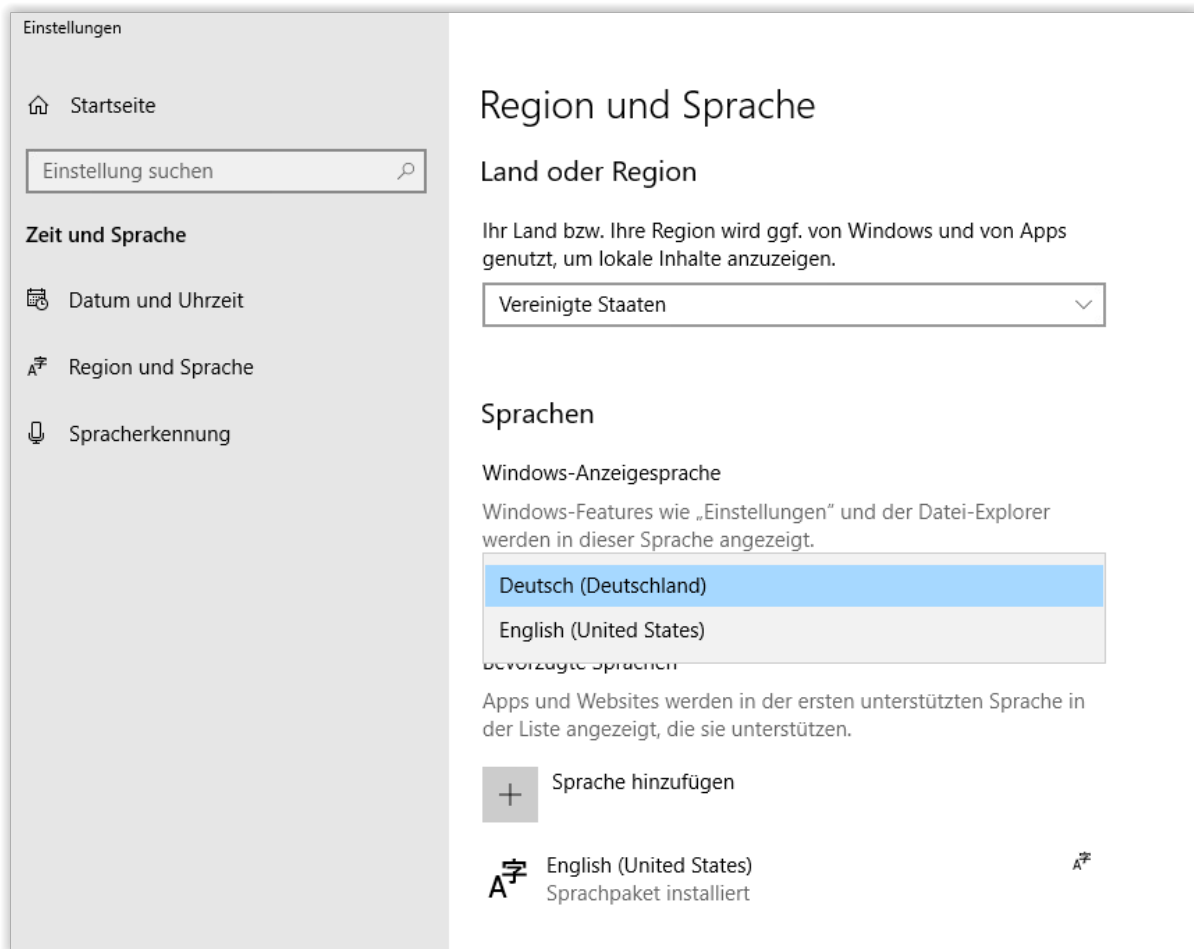

Now You can change Windows Display Language e.g. from German to English.
