

Westfälische Wilhelms-Universität Münster

# Fast scanning calorimetry on the glass transition of an Mg-based bulk metallic glass

Bachelor thesis in Physics  
Material Physics Institute

Eric SEELMAYER  
2014

# Contents

<b>1. Introduction</b> .....	2
<b>2. Metallic glasses</b> .....	3
2.1 Glass and crystal	
2.2 Glass formation	
2.3 Glass transition	
2.5 Bulk metallic glass	
2.6 Mg-based bulk metallic glasses, $Mg_{65}Cu_{25}Y_{10}$	
<b>3. Activation energy, Kissinger Plot</b> .....	9
<b>4. Differential scanning calorimetry</b> .....	11
4.1 Fast scanning calorimeter	
4.2 Diamond calorimeter (PerkinElmer)	
<b>5. Procedure</b> .....	14
5.1 Placement of the sample on the chip	
5.2 Use of the fast scanning calorimeter	
5.3 Use of the Diamond calorimeter	
<b>6. Results</b> .....	19
6.1 Glass transition temperature without calibration	
6.1.1 Using the fast scanning calorimeter	
6.1.2 Using the diamond calorimeter	
6.2 Calibration	
6.2.1 Calibration of the fast scanning calorimeter	
6.2.2 Calibration of the Diamond calorimeter	
6.3 Final results: glass transition temperatures calibrated of MgCuY	
6.4 Kissinger plot	
<b>7. Discussion</b> .....	26
<b>9. Conclusion</b> .....	28
<b>Bibliography</b> .....	28
<b>List of figures</b> .....	29
<b>List of tables</b> .....	29
<b>Acknowledgments</b> .....	30
