

CONCENTRATION-DEPENDENT NUCLEATION
RATES OF BINARY AU-GE AND CU-GE
ALLOYS

Masterarbeit

zur Erlangung des Grades Master of Science
im Studiengang Physik
der Westfälische Wilhelms-Universität Münster

vorgelegt von

Manoel W. da Silva Pinto

aus São Paulo (BR)

2019

Gutachter: Prof. Gerhard Wilde

Zweitgutachter: Dr. Martin Peterlechner

Contents

List of Figures	i
List of Tables	iii
1 Introduction	1
2 Theoretical Background	3
2.1 Classical Nucleation Theory	3
2.1.1 Homogeneous Nucleation	3
2.1.2 Heterogeneous Nucleation	7
2.2 Binary Alloy Solidification	8
2.3 Survival Analysis	10
3 Experimental Details	13
3.1 Differential Thermal Analysis	13
3.1.1 DTA Calibration	14
3.2 Sample Preparation and Glass Fluxing Technique	17
3.3 Statistical Analysis of Undercooling Measurements	19
4 Results	25
4.1 The Cu-Ge System	25
4.2 Nucleation in Cu-Ge	26
4.2.1 Interfacial Free Energy and Spaepen Factor	37
4.3 The Au-Ge System	40
4.4 Nucleation in Au-Ge	41
5 Discussion	43
5.1 Undercooling	43
5.2 Nucleation Rates and Parameters	46
5.3 Spaepen Factor	48
6 Summary	51
Bibliography	53
