Cryogenic Cycling of Bulk Metallic Glasses

A study on thermal and mechanical consequences of thermal cycling

Master's thesis by Jonas Lübke
October 2017

Contents

1. Introduction	1
2. Metallic Glasses	3
2.1. The glass transition	6
2.1.1. The free-volume model of the glass transition	7
2.2. Cryogenic rejuvenation	11
3. Processing & Characterization of initial samples	15
3.1. Copper mould casting	15
3.2. Sample characterization	17
3.2.1. Energy dispersive X-ray spectroscopy	17
3.2.2. X-ray diffraction	20
3.2.3. Differential scanning calorimetry	23
3.3. Cryogenic cycling	29
4. Experimental Proceedings	31
4.1. Mechanical analysis	31
4.1.1. Three point bending test	31
4.1.2. Ultrasonic measurements	33
4.1.3. Nanoindentation	34
4.2. Thermal analysis	38
4.2.1. Calorimetry	38
4.2.2. Low temperature heat capacity measurements	42
5. Results & Discussion	49
5.1. Mechanical effects	49
5.1.1. Three point bending test	49
5.1.2. Ultrasonic measurements	55
5.1.3. Nanoindentation	56
5.2. Thermal effects	60
5.2.1. Calorimetry	60
5.2.2. Low temperature heat capacity measurements	77
6. Conclusions & Outlook	85
A. Appendix	89
Bibliography	93
List of Figures	99
List of Tables	103
