Call for student assistant position (5 h/week)

The Department of Sport & Exercise Psychology is looking for a student assistant for 5 hours per week as soon as possible.

The scope of tasks includes collaboration in research projects on the relationship between movement and cognition at the Department of Sport & Exercise Psychology. The aim of the projects is to investigate the effect of body and movement on cognitive processes (e.g. anticipation, perception, decision-making) in sport and to understand whether and how sensorimotor simulation supports cognition. The collaboration includes:

- Assistance with data collection, data entry, data analysis & data processing
- Assistance with the organisation of the projects
- Literature research (on embodied cognition, perception-action coupling, anticipation, etc.)
- Further organisational tasks in the department

The employment is initially limited to 6 months, an extension and long-term cooperation is sought. All sports-science students (teaching degree, BSc./MSc.) are welcome. The compensation corresponds to the usual rates for student assistants at the WWU.

Requirements

- Confident in using Word, Excel & PowerPoint
- Good understanding of research methodology
- Willingness to take responsibility
- Reliability
- Ability to work in a team
- Independence
- Interest in researching cognitive processes in the context of sports

Application

If you are interested, please contact Edda van Meurs by e-mail or during office hours (edda.vanmeurs@uni-muenster.de).
