

# How Do I Find Literature in the Library of Sports and Exercise Sciences?

I have information on author(s), titles etc. of books, e.g. a bibliography:

- **Search in DISCO -> Search across all fields**
  - contains printed and electronic books and journals as well as articles from e-journals with information about their location in the Library of Sports and Exercise Sciences and other WWU libraries or direct access to the electronic full text.
  - DISCO offers filter options to limit the number of hits. The filter options can be used, for example, to limit the selection to the holdings of the Library of Sports and Exercise Sciences.
- **Search in ULB catalogue -> Search via title words / author**
  - Contains printed and electronic books and journals with information about their location in the Library of Sports and Exercise Sciences and other WWU libraries or direct access to the electronic full text.
- **I am looking for literature about a specific topic:**
  - **Search in DISCO -> Search across all fields**
    - contains printed and electronic books and journals as well as articles from e-journals with information about their location in the Library of Sports and Exercise Sciences and other WWU libraries or direct access to the electronic full text.
    - DISCO offers filter options to limit the number of hits. The filter options can be used, for example, to limit the selection to the holdings of the Library of Sports and Exercise Sciences.
  - **ULB catalogue → keyword search**
    - **Search via the search option “keyword” (“Schlagwort”)**
    - contains printed and electronic books and journals (no articles!) with information about their location in the Library of Sports and Exercise Sciences and other WWU libraries or direct access to the electronic full text.
  - **Database research in SURF and SportDiscus**
    - Research of articles from German and international journals and books.
    - The availability of books and articles in printed or electronic form at the WWU Münster is automatically displayed in a further step. If the desired literature is not available in Münster, interlibrary loan is possible.
- **I have information on journals or articles from journals, e.g. a bibliography:**
  - **Search in DISCO -> Suche across all fields**

- contains printed and electronic books and journals as well as articles from e-journals with information about their location in the Library of Sports and Exercise Sciences and other WWU libraries or direct access to the electronic full text.
- DISCO offers filter options to limit the number of hits. The filter options can be used, for example, to limit the selection to the holdings of the Library of Sports and Exercise Sciences.
- **Attention:** Filtering and thus limiting results to the holdings of the Library of Sports and Exercise Sciences will only show the holdings of printed journals.
- **Search in ULB catalogue -> Exact title**
  - contains printed and electronic books and journals with information about their location in the Library of Sports and Exercise Science and other WWU libraries or direct access to the electronic full text
  - all journal titles (BUT: no articles!) are included.
  - Journals can only be searched by their title. Entering names of persons, year specifications, etc. results in 0 hits.
  - The journal search should be narrowed down using the search function “exact title” (“Exakter Titel”) to avoid too many hits.
  - **Articles can only be searched via the journal title.** Missing information on articles can be added via databases (see above).
  - The most important journals can be found on the overview map in the journal room in the Library of Sports and Exercise Sciences.
  - Journals can be found in the journal room and in the small group work room, the latest issues are under supervision – please ask at the information desk.

Stand: April 2020
